

## COMMANDER GRILL LIGHTS

At only 7mm these are one of the thinnest grill lights available, great for those tight spots and/or achieving a sleek professional look. Ultra-thin they may be, but don't be fooled, 6 x next generation 3w LEDs means these light pack a mighty punch. Wire multiple lights together for synchronised operation. Program them to flash simultaneously or to alternate flash.

C10031A

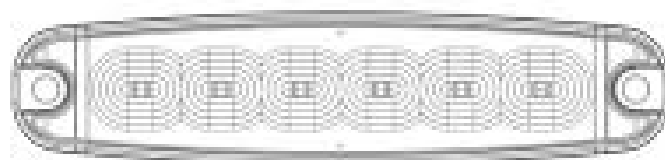

C10031M

- Multi voltage: DC 9-30V
- 6 x 3w LEDs
- Certified EMI free
- High and low intensity
- Extremely low current draw, less than 1amp
- 20 flash patterns, with memory function
- Simultaneous or alternating synchronisation
